Customer Promise

Enhance customer experience by offering more fulfilment choices, an aggressive promise and a promise to keep. Also, save fulfilment costs by optimizing sourcing and logistics choices based on rules.

Store Picking & Fulfilment

Leverage existing store assets and stock to increase revenue from digital channels. Model store shelf picking operations, staging, printing, customer pick-up and hand-over to delivery at stores.

Site Execution

Automate and optimize digital fulfilment at sourcing and fulfilment sites to improve throughput, fill rates and customer experience. Model operations in stores, vendor sites, pick-up, drop-off points and delivery centres.

End-2-end Order Management

Partner with us to develop the complete end to end order management system that includes centralized inventory visibility and promise, order lifecycle, Fulfilment orchestration, order payments and invoicing, returns & refunds, light weight warehouses or service sites, customer service interface and site execution interface.

Order Payments & Invoicing

Enhance customer experience by offering more payment choices, error free payment transaction handling and accurate invoicing. Avoid reconciliation and financial posting errors with detailed financial processing.

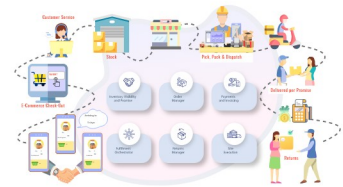

Fulfilment Orchestrator

Enhance customer experience by offering more fulfilment choices, delivering faster and tracking Fulfilment logistics to ensure delivery promise. Manage complex fulfilment plans involving distributed sourcing and fulfilment locations and multiple fulfilment legs.

Returns Manager

Retain customers by providing a seamless, flexible and rules based return experience. Configure rules based return eligibility, authorization, reverse logistics, return invoicing and refunds processing.
