

e3NexT

About Us

At e3NexT, we are always striving to help omni-channel enterprises optimize their fulfillment processes and enhance their customer's post purchase experience.

Our cost effective and agile approach to business technology that leverages open source tech and agile architectures delivers functionally rich, faster to production and maintainable systems.

Fulfillment Orchestration

Business Efficiency

Model fulfillment flows for optimized sourcing

Customer Experience

Increase choice with split sourcing & multi-hop fulfillment

Technology Efficacy

Faster ROI with launch in 2 months at 1/3rd of cost

Model and manage complex fulfillment plan involving multiple sourcing and fulfillment locations and multiple fulfillment legs. Manage coordination between order management system requests, warehouses, stores, vendors, digital fulfillment systems, transportation, etc. Actively monitor enterprise wide fulfillment operations and pro-actively manage exceptions.

 **First launch in 3-4 months**

Leverage functionality from our Fulfillment Management service, Site Execution service, Logistics Management web UI, workflow tools and platform to develop and deploy the solution quickly.

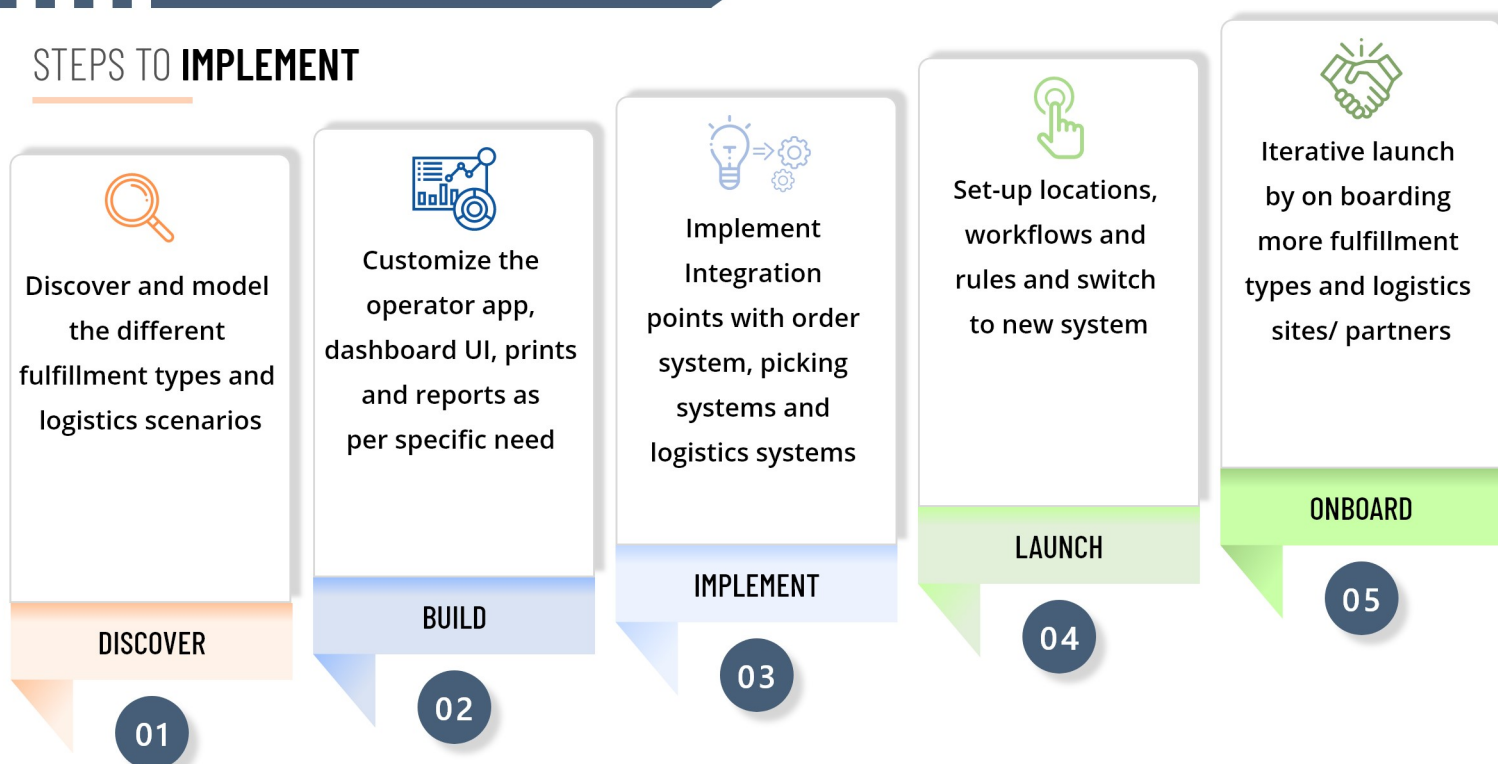

KEY FEATURES

- ✓ Model different fulfillment types - Ship to home, deliver to home, customer pick-up, ship to store, drive through, digital, etc.
- ✓ Orchestrate complex fulfillment scenarios like split sourcing, cross-dock and consolidation, multi-hop and multi-leg logistics
- ✓ Flexible and powerful modelling of complex fulfillment lifecycles using BPM workflow engines
- ✓ Support for downstream integration for a variety of logistics scenarios - Pick & Pack request, Dispatch, Customer pick-up, Receiving, logistics partner, Parcel carrier, etc.
- ✓ Rich and flexible fulfillment data model and configurable fulfillment workflows

KEY BENEFITS

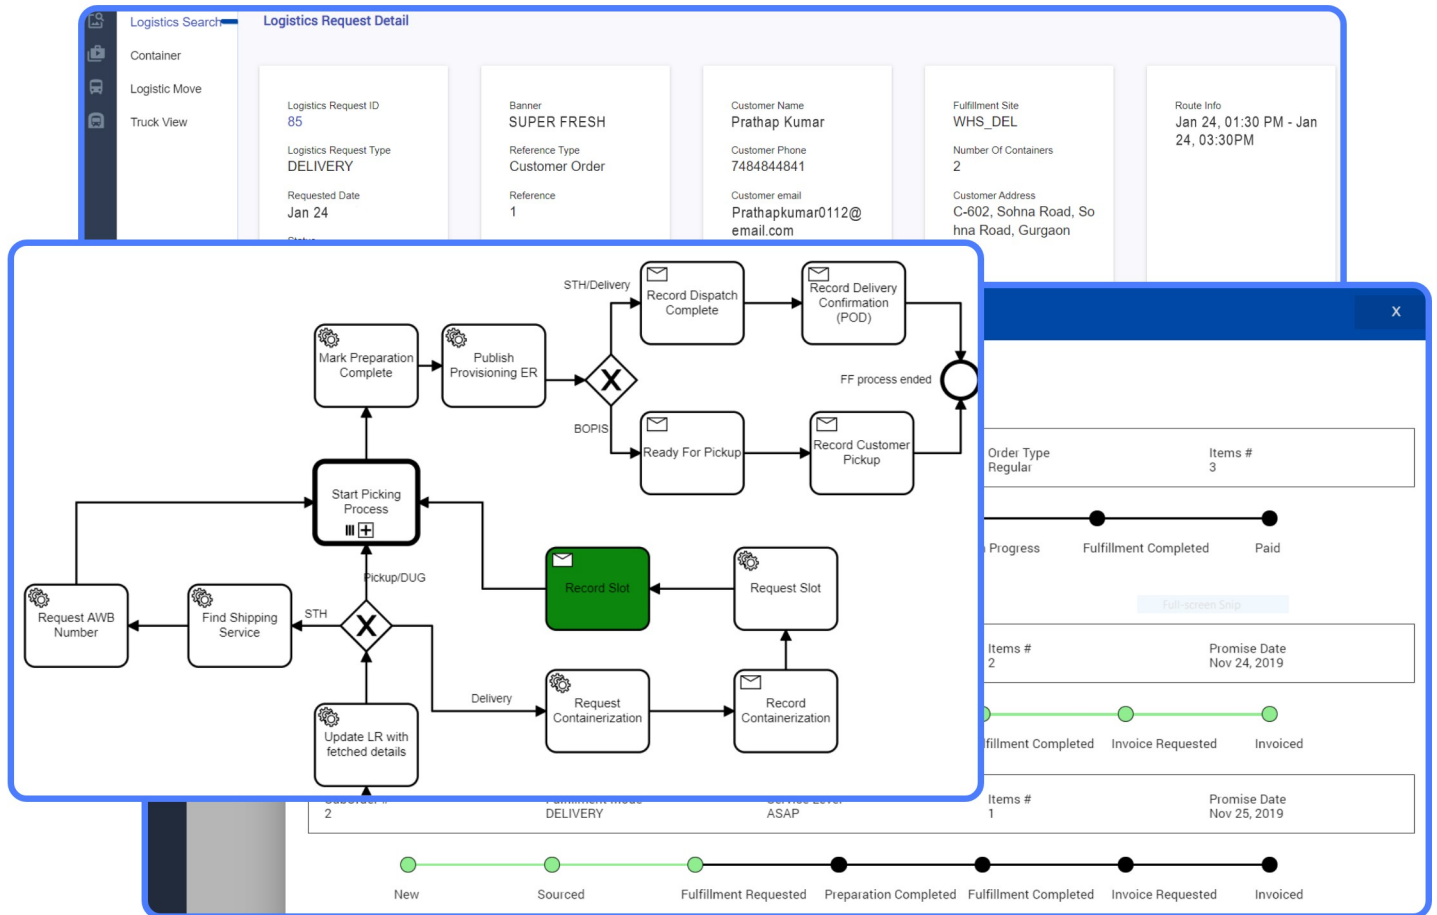

-  Enhance customer experience by offering richer fulfillment choices and flexible sourcing options
-  Improve business efficiency by enabling optimized sourcing options including multi-sourcing and consolidation, JIT procurement, MTO
-  Improve business efficiency by enabling system driven co-ordination of fulfillment activities across different sites and partners
-  Pro-actively monitor and identify enterprise wise fulfillment exceptions and offer an opportunity for timely fix

STEPS TO IMPLEMENT

CLIENT WORK

Representative Client Solution
